

For Earth, Against Empire

Pledge of Resistance

I pledge to take at least one nonviolent direct action FOR EARTH, AGAINST EMPIRE between now and the December 2015 Paris Summit where the United Nations is charged with setting new standards and solutions to climate change. I recognize that there is a war against Mother Earth. There are 90 corporations responsible for producing two thirds of all global warming emissions—mainly oil, gas and coal companies. The largest single purchaser of oil products in the world is the US military. Global capitalism is backed by US military power, aka Empire. Together, they are a leading cause of climate change. I will join a demonstration, commit nonviolent civil disobedience, or take some other life-affirming action that links Empire with Climate Change. By signing this pledge, I agree to be contacted by the FOR EARTH, AGAINST EMPIRE campaign to be put in touch with others in my area who are organizing such actions.
